PROFESSIONAL SUMMARY

Fullstack Developer and Agentic AI Engineer with 5+ shipped projects, 12 published npm packages, and 1 autonomous AI system with a live demo. Builds with OpenAI Agents SDK, MCP, RAG, FastAPI, Next.js and Docker. Currently completing BS Sociology — a background that directly informs how I build AI systems people actually want to use. GIAIC-certified. Self-driven — independently ships from idea to live production.

EXPERIENCE & PROJECTS

CRM Digital FTE Factory youtu.be/WIHltns8Z8

GIAIC Advanced Hackathon · Live demo available

- Automated 30+ hrs/week of business operations, measured by significant reduction in manual Gmail, WhatsApp and CRM tasks, by building a multi-agent AI system using OpenAI Agents SDK, MCP and Docker.
- Enabled 24/7 autonomous business communication, measured by live demo on YouTube, by integrating Gmail API, WhatsApp automation and CRM workflows into a single agentic pipeline using OpenAI Agents SDK and MCP.

Personal AI Employee (Digital FTE) github.com/EmanIqbal620/Full-Time-AI-Employee

GIAIC Advanced Hackathon 0 · Demo available

- Reduced 40+ hrs/week of repetitive daily tasks, measured by demonstrated end-to-end automation, by engineering a self-iterating agentic workflow using Claude Code, MCP Servers and Python file watchers.
- Built a highly automated AI system, measured by minimal manual input required after setup, with an Obsidian GUI dashboard, by implementing Python file watchers and MCP tool integrations.

Humanoid Robotics Book + RAG AI Tutor ai-native-book-ruddy.vercel.app

GIAIC Hackathon 1

- Delivered a 6-module, 24+ week robotics education platform covering ROS2, NVIDIA Isaac and VLA Systems, measured by real public users accessing it live on Vercel, by building with FastAPI and Neon PostgreSQL.
- Enabled instant AI-powered answers across all 6 modules, measured by a live embedded AI Tutor accessible to anyone worldwide, by building a RAG pipeline using Qdrant (vector database) and FastAPI.

TodoFlow AI Task Manager tobo-app-chatbot.vercel.app

GIAIC Hackathon 3

- Shipped a 6-feature full-stack productivity app with analytics dashboard and priority tracking, measured by live deployment on Vercel via CI/CD pipeline, by building with Next.js, FastAPI, OpenAI Agents SDK and MCP.
- Secured user data and enabled real-time task analytics, measured by live authentication and progress tracking in production, by integrating PostgreSQL, JWT authentication and Better Auth.

12 Open Source npm Packages npmjs.com/~emaniqbal620

Published on npm

- Built and published 12 fully-typed TypeScript packages on npm — including a calculator, ATM machine, quiz system, student management system and currency converter — all publicly installable and versioned.
